

STARBASE ATLANTIS GRADUATION INFORMATION:

Tomorrow, Friday, Oct. 19th, is graduation. It is a KODAK Moment. The Graduation will begin about 12:30 PM in the upstairs auditorium room on the same floor of Starbase. Please do not stop in the classroom, as your passes only allow for 15 min. before and after the graduation takes place. Go directly to the Auditorium.

It will be COLD in the auditorium but hot outside for the launch. So, dress in layers or bring a jacket.

We will all go from the top floor to the Launch site and not return upstairs. The students, too, will leave from the Launch Site in the assigned cars as always. They must return to the classroom. However, I do need a volunteer to bring back a tall box filled with our rockets to school. The box may be about 30 in. tall.

The Launch site is to the right of Bldg. 39, way behind the black construction site area.

*****If you did not sign up for a pass to get onto Ford Island, please contact the office in the morning. Mrs. Wilmot will be at school by 11:45 AM to give parents a ride. Mrs. Laszlo already has several in her car.**

This week has been an exciting but exhausting week for your student. They have learned a lot and just maybe, will like science and math with more enthusiasm.

Please return the Survey to me by tomorrow. If you miss this deadline, please turn it in next week. I would like a 100% return and will get the other ones to Starbase. If you can take time to write a note or e-mail one of the persons on the first sheet, it can help us keep STARBASE alive in Hawaii. It takes “important” people to work on keeping this program for us.

Mrs. M. Patterson
