Chocolate by Asia Sheehab

The funnest, most imaginary place I've been to is Hershey Park in Pennsylvania. Hershey Park is like a world of Reeses, Almond Joy, Hershey Kisses and anything sweet and chocolatey you can think of. The really weird, but amazing thing, was that the street lights were giant Hershey Kisses! The first place I went to in the park was the chocolate movie theater. As you watched what was happening on the screen your chair was moving, then popcorn and confetti fell from above! The scary part was that the show was 3-D while all this was happening. After the show my family and I went on a trolley ride through the chocolate gardens, towns, and after dropped us off at the chocolate museum where they displayed the largest most spectacular, humongous Hershey Kiss ever. Finally, all the excitement was over, but I hope I will be able to go again.
